FRIDGE PANEL VAN SOLUTION

SPECIFICATION SHEET

Innovate your refrigerated van fleet with TRAILAR and its industry-leading solar solutions.

TRAILAR's cutting edge technology is fitted to your vehicles roof, and directly interfaced with the on-board electrical systems.

Using harvested energy, TRAILAR is used to power all on-board ancillary equipment, allowing for a reduced

Up to 500L
Annual Fuel Saving

Up to 1.3t
Annual CO₂ Saving

Deep Telematic
Insights

Reduced
Maintenance Costs

STEP 1

We take your van and apply ultra-thin solar matting to the vehicle roof.

STEP 2

Connect the matting to the smart charge controller which interfaces with the vehicle battery and alternator.

STEP 3

Your vehicles emissions and fuel spend are reduced by utilising the suns harvested energy, to power your vehicles ancillary equipment.

FITTING PROCESS

1. Solar mats applied using adhesive backing
2. Smart Charge Controller mounted at front end of chassis rail
3. Sensors are attached to monitor the alternator, battery, ancillary equipment & charge controller
4. Connection to vehicle via ignition switch or FMS (Fleet Management System)
5. IP68 rated system

WHAT'S INCLUDED?

FAST FACTS

Independently Tested & Validated

Installation Less Than 6 Hours

3mm Thin Solar Mats

Full System Weighs 23kg

Shatterproof & Durable

Powerful Solar Conversion

Real-Time Data + GPS
